SUMMARY

I'm a passionate and performance-driven Java Full Stack Developer with hands-on experience in building secure, scalable, and maintainable web applications. I specialize in backend development using *Spring Boot*, *Hibernate*, and *RESTful APIs*, and I bring a strong understanding of database design, application architecture, and clean code principles.

I have a solid problem-solving mindset, and I enjoy translating real-world challenges into efficient and reliable software solutions. I'm comfortable working across the full development lifecycle—from planning and designing to building, testing, and deploying.

My goal is to contribute to impactful projects that demand precision, performance, and smart engineering, while constantly learning and growing as a developer in a collaborative environment.
